

PLANNING

The Modern Approach to Manpower Planning

This Seminar is co-organised by Singapore Productivity Centre and Motivare Pte Ltd for SME Leaders, HR and Finance practitioners in the F&B and Retail sector with a desire to increase productivity in their organisation.

Manpower is seen as a huge catalyst to running of the business and is often done at the last stage before an opening of an outlet or when in a hassle to find a replacement. This may result in getting the wrong fit, leading to poor service and bad reviews on social media platforms which poses a negative impact on the business. No amount of service recovery can reverse the bad impression of the outlet or restaurant.

During this session, we will share insights on:

- Importance of manpower planning
- Manpower planning as an essential factor to business planning
- Best key practices to help with manpower planning

Speaker's Profile

Jethro Yee, Managing Director & Founder

Before founding HuOrgCology, Jethro heads the Corporate Solutions in SHRI Corporation where he strategizes and formulates corporate solutions to help HR and business leaders to develop their workforces' capabilities and supports organizations' operations to ensure business sustainability and continuity.

He also held the Learning and Development Lead for corporate organization and had spearheaded Regional Learning Strategies and Total Company Learning Plan to develop next generation talents to meet business needs. In addition, he also partnered with many organizations to design their Competencies Framework for Leadership, Behavioural and Functional to map organizations' learning and career blueprint so as to maximize organizations' learning dollar value.
